Figure.Resilience Model for Patients with Breast Cancer(RM-BC)

**Figure S1.** The final framework of the resilience model for patients with breast cancer (RM-BC). Emotional Distress, Physical Distress and Social Support are three independent variables affecting the outcome variables of Transcendence and Resilience by adjusting four moderating variables of Self-efficacy, Courage-related strategy, Intrusive Thoughts and Hope for the Future.

**Figure S2.** Real and Random-Data Eigenvalues for N-Roots based on Parallel Analysis
