ACRO 2017 Contouring Session – Physician Survey

Please complete the following questions based on your clinical experience accessing contouring resources.

1. Indicate your level of experience (select one):
   - [ ] I am a current resident
   - [ ] <5 years in practice
   - [ ] 5-9 years in practice
   - [ ] 10-14 years in practice
   - [ ] 15-19 years in practice
   - [ ] 20+ years in practice

2. Indicate your level of specialization (select one):
   - [ ] I treat all disease sites (excluding pediatrics)
   - [ ] I treat 2-3 disease sites
   - [ ] I treat only 1 disease site

3. When you have a question about contour delineation, indicate how frequently you will:
   Mark one oval per row.
   - [ ] Ask another radiation oncologist
   - [ ] Access NCCN guidelines
   - [ ] Access an RTOG atlas
   - [ ] Access a contouring textbook
   - [ ] Access a protocol for a recent clinical trial
   - [ ] Perform a literature search for a relevant publication

Other than those listed above, what resource(s) do you use to assist with contour delineation?

____________

4. Indicate whether there is a contouring CONSENSUS GUIDELINE (published within the past 5 yrs) for:
   Mark one oval per row.
   - [ ] Gastroesophageal junction (GEJ) cancer
   - [ ] Hepatocellular carcinoma (HCC)
   - [ ] Nasopharyngeal cancer
   - [ ] Head & Neck organs-at-risk (OAR) / normal structures
   - [ ] Definitive non-small cell lung cancer (NSCLC)
   - [ ] Glioblastoma (GBM)
   - [ ] Spine SRS/SBRT for bone mets
   - [ ] Non-Hodgkin’s Lymphoma (NHL)

5. The reason(s) I don’t access contouring CONSENSUS GUIDELINES more often is:
   Select all that apply.
   - [ ] Too complex
   - [ ] Not comprehensive
   - [ ] Not easy to use
   - [ ] Not evidence-based
   - [ ] Not up-to-date
   - [ ] Not enough time
   - [ ] I am not always aware of publication
   - [ ] Development process not transparent
   - [ ] Users not engaged in development

Thank you for your participation! Please turn this in to the speaker at the completion of the contouring session.
