Supplementary Figure 1

a: Tumor volume analysis using B16 melanoma cells. Changes in tumor volume of the abscopal tumor. Tumor volume was measured every 2 days. * p<0.05 between the indicated groups.

b: Kaplan-Meier plot to show the survival after treatment of the mice inoculated B16 melanoma cells. Statistical differences were tested using log-rank test.
Supplementary Figure 2

Supplementary Figure 2

Foxp3 positive T cells to CD4 positive T cells ratio in tumor nests identified by immunohistochemistry. *p<0.05 vs CON, ** p<0.05 between the indicated groups.
