Correction: Notice of Redundant Publication

A Joint Advisory by Therapeutic Drug Monitoring and Clinical Pharmacokinetics

We are writing to inform our readers of two incidents of redundant publication among five papers that were recently published, two in Therapeutic Drug Monitoring, two in Clinical Pharmacokinetics and one in a Chinese-language journal, as follows:

These papers were brought to the attention of the Editors of both Journals. We have examined these papers and have concluded that there is significant repetition of content and analysis. Importantly, the authors did not inform each journal that similar papers were submitted to other journals.

We regret these incidents of redundant publication and, on the authors’ behalf, we apologize to our readers.
