

Additional Reader Service

We are pleased to offer our readers exclusive supplementary material related to the topics presented in the book. This includes our software, called **Strategy Navigator**. Should you be interested in this service, please do not hesitate to request access by sending an email to software@futurevalue.de.

Upon request, you will receive a license to use the **Strategy Navigator free of charge**. This professional software solution has been developed by FutureValue Group AG. This tool provides decision support under uncertainty and is specifically designed to meet all legal requirements for the preparation of business decisions in accordance with the Business Judgement Rule (§ 93 AktG).

The Strategy Navigator is a comprehensive risk management solution that goes beyond conventional software. This is an integrative management system for corporate management under uncertainty. It is methodically sound, legally compliant and proven in practice.

The Strategy Navigator

- fulfils the requirements of § 1 StaRUG, GoP 3.0 and § 93 AktG.
- is designed to provide simulation-based decision support.
- enhance the company's robustness and resilience, contributing to an overall increase in its value.
